

Local Area Network (LAN) is a mandatory part of almost all office environments. LAN is the infrastructure that provides connectivity between computers, laptops, printers, scanners, data storage servers, application servers and other devices such as smart-phones. LAN is used to collectively connect all your computers to the Internet, to view web pages, send receive emails, participate in voice or video calls.

Network and computer technology evolves at a rapid pace. It is very important that the LAN infrastructure is designed and built with future growth in mind. If your organization grows in size then the LAN infrastructure should be able to grow with you to meet your connectivity needs. If the speed at which computers and servers communicates across the LAN increases then the ability for the LAN to work at ever increasing speed should be taken into consideration.

Our solution

Ocuro's dedicated team will analyse your business requirements and design and build solutions for your organization, taking into account your current and future needs. Ocuro will ensure you have the best cost-effective solution and reduced operational cost by providing access to our expert sales and maintenance teams.

Our network operations team will ensure you receive after-sales operational support ensuring you have a dedicated team of experts to assist you on your day-to-day functionality.

Ocuro maintains strong relation with many LAN equipment suppliers, this allows us to provide cost-effective solutions to our customers.

Summary

- Our team of engineers will ensure your network is designed and built to operate in current and future environments.
- Our close relation with many LAN equipment providers allows us to give you cost-effective solution.
- We provide proactive network management with single point of contact for quick resolution of service effecting issues.
- We can reduce your operational costs by managing your network while you concentrate on your core business.
- Our services are offered with strict Service Level Agreement.
